

### Project Purpose

There are currently no business continuity systems in place. This leaves the organization vulnerable to electrical, heating/cooling, and equipment failures that could result in minor to catastrophic loss of data for the City. Implementation of basic business continuity is necessary to comply with commitments to citizens and federal regulations for storage and retrieval of core services of the City.

### Project Description

This is a capital purchase to implement complete business continuity systems for database, fileshare, and other systems within all departments. The system will be used by all City departments.

### Location

Fire Station #3

### Designer

Not applicable

### Contractor

Purchase made from various entities

### Timeline

**Estimated Purchase Date:** Summer 2012

**Estimated Completion Date:** Fall 2012

### Total Cost

\$861,000

### Funding Sources

**City:** 100%
